**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 2664

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 6-8 are rejected under 35 U.S.C. 102(e) as being anticipated by Lyons et al (6,075,798, of the record).

Regarding claims 6,7, Lyons et al disclose packet communication system incorporating the step of transmitting packets having headers configured to include an indication of whether or not field values and/or lengths within the header have been altered from a pre-established norm (lines 15-21, col. 8); wherein the headers include protocol extension fields, the values of which may be used to indicate whether or not the field values and/or lengths have been altered (310,320 of fig. 10).

Regarding claim 8, Lyons et al disclose packet communication system incorporating the step of indicating to components of a computer network whether field lengths and/or values of packet headers associated with communication packets transmitted between the components of the network have been altered using protocol extension bits included within the headers (lines 15-21, col. 8; 310,320 of fig. 10).

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 9-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lyons et al.

Lyons et al disclose all the claimed subject matter as described in previous paragraph except that the extension field of Lyons et al use 2 bits. Lyons et al however, disclose in lines 32-34, col. 10 that any number of bits can be defined as the extended header. Therefore, it would have been obvious to one skilled in the art to use 2 bits (0,1) which represent four combination i.e. 00,01,10,11 that represent different states have been obvious to one skilled in the art since it consider to be the design choice.

5. Applicant's arguments filed 10/22/03 have been fully considered but they are not persuasive. The applicant argued that the Lyons reference does not disclose the fields or suggest providing extension bits within a packet header which indicate whether the fields within that header have been modified and can be used to indicate changes within the header itself. However, the above limitation is disclose in lines 15-21, col. 8; 310,320 of fig. 10.

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to **AJIT G. PATEL** whose telephone number is 703-308-5347. The examiner can normally be reached on **MONDAY-THURSDAY**.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Wellington Chin can be reached on 703-305-4366. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
